Ho Chi Minh City, Vietnam • Email: tuan1060369@gmail.com • Phone: 0337562887

Detail-oriented AI Data Specialist with experience in search quality evaluation and large-scale data annotation for machine learning systems. Strong ability to analyze user intent, assess query–result relevance, and apply complex guidelines to generate high-quality training data. Familiar with human-in-the-loop AI processes and maintaining high accuracy in remote work environments.

EDUCATION

Thu Dau Mot University, Vietnam

Bachelor of Information Technology

GPA: 3.0

EXPERIENCE

Appen — Remote

Search Quality Rater (AI/Data Annotation) | 04/2021 – 03/2025

- Evaluated and labeled large-scale search and advertisement datasets to support AI model training and optimization.
- Analyzed user intent and query–result relevance, contributing to improved search ranking quality and content alignment.
- Assessed landing pages based on E-E-A-T principles (Experience, Expertise, Authoritativeness, Trustworthiness) and content usefulness.
- Applied complex annotation guidelines to ensure high-quality training data for machine learning systems.
- Performed in-depth web research and data validation to enhance decision accuracy and consistency.
- Contributed to human-in-the-loop AI processes, improving model performance through precise and reliable data labeling.
- Maintained high productivity and quality benchmarks in a distributed, remote environment.

Mekong Furniture — Vietnam

HR Intern | [5/2025 – 7/2025]

- Supported recruitment processes including CV screening, candidate shortlisting, and interview coordination.
 - Assisted in maintaining and organizing HR databases and employee records.
 - Participated in onboarding activities and internal documentation processes.
 - Strengthened communication and organizational skills in a professional corporate environment.
-

SKILLS & INTERESTS

- **Technical:** Python (Data Processing), SQL/MySQL, Data Analysis, Data Annotation & Labeling, AI Prompt Engineering, LLM Application (CV Screening, Content Evaluation), Basic Automation Workflow
- **AI & Data Competencies:** User Intent Analysis, Query–Result Relevance Modeling, Data Quality Assessment, Guideline-based Evaluation for AI Training Data, Human-in-the-loop AI optimization
- **Professional:** Analytical Thinking, Attention to Detail, Problem Solving, Structured Decision Making, Remote Collaboration
- **Language:** Vietnamese (Native), English.
- **Interests:** Applied AI systems, LLM optimization, AI-powered HR solutions, Data-driven product improvement, Intelligent workflow automation
